Forensic Experience:

- 1979 – present Approximately 400 opportunities to offer expert testimony in court. Testified in State Superior, Federal District, and Canadian courts. Included both Civil and Criminal proceedings. Testimony also offered in approximately 100 arbitration and administrative law proceedings. Retentions and testimony has been offered equally on behalf of plaintiffs and defendants during the past 15 years. My first forensic case was assigned while I was a Postdoctoral Fellow in 1976.
- 1979 – present Approximately 1500 opportunities to offer expert testimony in deposition. Testimony has been offered in approximately equal numbers of plaintiff and

defense-related matters, primarily in head injury and neurobehavioral toxicology cases, as well as medical malpractice, very occasional criminal cases, and rare workers' compensation IME cases.

1998 – 2013 Co-Founder and Co-Director (with Lawrence Goldberg, ESQ.) “*Cogito Juris Inc.: The Brain Injury Arbitrators.*” This company is a specialty “carve-out” for narrow-focus arbitration proceedings and mediations involving cases of brain injury and associated neurobehavioral disorders. We maintain a list of “preferred providers” in various medical and psychological specialty areas. Our Arbitrators and Mediators are all practicing attorneys with specialty interests in brain injury and represent both plaintiff and defense firms equally. We do not employ judicial arbitrators. *Literature available upon request.*

Continuing Education Programs for Psychology Clinical Faculty:

As the Clinical Faculty Coordinator for Psychology, part of my responsibilities include the organization of one to two special topics workshops directed to our supervising Clinical Faculty member in Psychology who attend in the Medical Psychology Assessment Center (MPAC). We have held three such workshops beginning in 2006 that have included preparation for Forensic Testimony, Evaluation of Dangerousness to Self and Others, and an update concerning Cross Cultural Issues pertinent to supervision of clinical cases within the MPAC. Each of these three workshops provided a total of three hours of CE credit for participants. Since we are now a California CE-approved provider for Psychology, I am hopeful that we will be able to expand these special topic review workshops such that they will now be open and available to all of our Psychology Clinical Faculty (not just those Clinical Faculty members who supervise in the MPAC program), and will generally be day-long seminars that should yield up to six hours of CE per course offering.

The next planned CE workshop is to cover topics related to the assessment of effort, motivation, and possible feigning or malingering using psychometric measures, including strengths and pitfalls in the approach as they apply to clinical and forensic applications of such measures. A firm date for this particular workshop has not been set, although it is anticipated that the workshop will take place during 2008, and will be open to licensed providers in Psychology in the community, in addition in to our faculty, staff and trainees in Psychology at UCLA.

Past and Present Research Projects:

1980 – 1983 Effects of phencyclidine and mixed polypharmacy on neuropsychological and neurological parameters in adolescents (Wellisch, Schaeffer, et al., Department of Psychiatry and Biobehavioral Sciences, Geffen UCLA School of Medicine)

- 1982 – 1984 Development and standardization of a simple cancellation task for assessment of attention (Schaeffer and D’Elia, Department of Psychiatry and Biobehavioral Sciences, Geffen UCLA School of Medicine)
- 1983 – 1986 Cognitive deficits and altered cerebral metabolism (PET) associated with primary degenerative dementia (Kuhl, Ashford, Marsh, Riege, Schaeffer, et al., Geffen UCLA School of Medicine)
- 1992 – 1997 Neuropsychological and behavioral findings in ANA positive women with silicone breasts implants (Wellisch, Latz, Schaeffer, et al., Geffen UCLA School of Medicine)
- 1996 – 1997 Neurocognitive assessment following repeated ECT trials in a seizure patient with intractable depression following neurosurgery (Kaufman, Saucedo, Schaeffer, et al., Cedars-Sinai Medical Center and Geffen UCLA School of Medicine)
- 2004 – 2009 Diffusion MRI findings in Patient/Litigants with Mild Head Injury and the Postconcussional Disorder (Franklin Moser, MD. Chief of Neuroradiology and Jeffrey Schaeffer, Ph.D., Consulting Neuropsychologist, Cedars-Sinai Medical Center, Los Angeles)
